PROFESSIONAL SUMMARY

Data Scientist with strong expertise in SQL, Python, and machine learning, specializing in transforming complex datasets into actionable insights. Experienced in building automated data workflows, statistical modeling, and business intelligence solutions to support data-driven decisions. Proven success in improving data reliability, optimizing performance, and enhancing analytics accessibility for cross-functional teams.

EDUCATION

University of Illinois Urbana-Champaign, Champaign, IL — Aug 2022 – Dec 2023
Master of Science in Statistics
Relevant Courses: Data Science Programming Methods, Database Systems, Advanced Data Analysis, Mathematical Statistics, Risk Modeling and Analysis

National Taiwan University, Taipei, Taiwan — Sep 2017 – Jun 2022
Bachelor of Science in Agricultural Economics
Relevant Courses: Machine Learning, Advanced Statistics, Agricultural Finance

Nanyang Technological University, Singapore — Jan 2022 – May 2022
Exchange Coursework: Multivariate Analysis, Consumer Neuroscience, Equity Securities

PROFESSIONAL EXPERIENCE

COUNTRY Financial, Bloomington, IL
Business Intelligence Analyst (Full-time) — Jan 2024 – Present

- Built and maintained GitLab CI/CD pipelines to automate data workflows, reducing refresh time by 60% and enabling near real-time analytics.
- Designed and deployed Tableau dashboards powered by SQL to deliver interactive insights and real-time performance monitoring tools.
- Analyzed large datasets to support underwriting, pricing, and reporting, applying advanced statistical and analytical methods.
- Collaborated on GitLab documentation to streamline internal workflows and cross-functional communication.

COUNTRY Financial, Bloomington, IL
Business Intelligence Analyst Intern — May 2023 – Dec 2023

- Developed an AI-powered underwriting fraud detection model using RoBERTa NLP, achieving 70% accuracy and winning first place in the annual Intern Case Study Competition.

National Taiwan University, Taipei, Taiwan
Research Assistant — Aug 2019 – Dec 2021

- Conducted statistical and predictive analysis of agricultural pricing data, improving forecast accuracy by 20%.
- Supported economic research on grain futures and bonds, contributing to commodity pricing and market forecasting models.
- Built SQL databases integrating air quality, address, and population data to examine environmental and behavioral patterns.
- Analyzed SafeGraph mobility data to uncover a 30% post-COVID increase in Disneyland visits among the lower 10–50% income groups.

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, C/C++, SAS, STATA, JavaScript, HTML, CSS
Analytics & BI: Tableau, Power BI, Statistical Modeling, Data Analytics, Business Intelligence, Data Visualization
Data Engineering & Cloud: Snowflake, Google BigQuery, AWS, MySQL, MongoDB, Git, GitLab CI/CD, Docker, Database Management, Workflow Automation
AI & Machine Learning: Machine Learning, NLP, Transformer Models, Predictive Modeling, LLMs, AI Agents, OpenAI (ChatGPT, Codex), Microsoft 365 Copilot
Professional Skills: Communication, Strategic Planning
